Software Engineering MCQs

MCQs on Software Engineering

Solve Software Engineering multiple-choice Questions to prepare better for your upcoming GATE Exam. If you wish to learn more about Software Engineering, you can check more notes, mock tests, and previous years' question papers of GATE. Gauge the pattern of Software Engineering multiple-choice questions. Try solving the ones that we have compiled below for your practice:

Software Engineering Multiple-Choice Questions

1. Which of these does not affect different types of software as a whole?

a. Security

b. Business and social change

c. Flexibility

d. Heterogeneity

Answer: (c) Flexibility

2. The 4GT Model acts as a package of _____.

a. Software Tools

b. Software Programs

c. CASE tools

d. None of the above

Answer: (a) Software tools

3. _____ originally proposed the spiral model.

a. Pressman

b. Royce

c. IBM

d. Barry Boehm

Answer: (d) Barry Boehm

4. Out of the following, which one is not a workbench tool for Requirement Management?

a. RDD 100

b. Rational Suite

c. DOORS

d. RTM

Answer: (b) Rational Suite

5. In system modelling, which model depicts a system's static nature?

a. Data Model

b. Structural Model

c. Context Model

d. Behavioural Model

Answer: (b) Structural Model

6. Source code translation and Program modularisation are the activities of_____.

a. Reverse engineering

b. Forward Engineering

c. Reengineering and Reverse Engineering

d. Reengineering

Answer: (d) Reengineering

7. Which of these reliability requirements is concerned with maintaining various system copies?

a. Ambiguous Requirements

b. Redundancy Requirements

c. Recovery Requirements

d. Checking Requirements

Answer: (c) Recovery Requirements

8. The worst form of module cohesion is_____.

a. Coincidental Cohesion

b. Functional Cohesion

c. Temporal Cohesion

d. Logical Cohesion

Answer: (a) Coincidental Cohesion

9. How does the implementation of generalisation occur in Object-Oriented programming languages?

a. Encapsulation

b. Abstract Classes

c. Inheritance

d. Polymorphism

Answer: (c) Inheritance

a. Wirfs-Brock method

b. Booch method

c. Coad and Yourdon method

d. Rumbaugh method

Answer: (b) Booch Method

11. Out of these web engineering metrics, which one measures the relatedness extent between multiple web pages?

a. Static Content Objects Numbers

b. Dynamic Content Objects Numbers

c. Internal Page Links Number

d. Web Page Similarity

Answer: (d) Web Page Similarity

12. Which one isn't a stage of the COCOMO-II?

a. Model of Application Composition estimation

b. Model of Early design estimation

c. Model of Post architecture estimation

d. Model of Comprehensive cost estimation

Answer: (b) Model of Early design estimation

13. Which one isn't an approach to estimate the cost of the software?

a. Heuristic

b. Empirical

c. Critical

d. Analytical

Answer: (c) Critical

14. The aviation industry follows which of these standards?

a. RTCADO-178B

b. CTRADO-172B

c. CTCADO-178B

d. RTRADO-178B

Answer: (a) RTCADO-178B

15. We generally use the _____ for Software Maintenance.

a. Integration Testing

b. Unit Testing

c. System Testing

d. Regression Testing

Answer: (d) Regression Testing

16. The language-processing system performs the translation of an XML data description to a_____.

a. alternative XML representation

b. machine code

c. software module

d. alternative XML representation and machine code

Answer: (d) alternative XML representation and machine code

17. What establishes the profile of end-users of the system?

a. system image

b. mental image

c. user's model

d. design model

Answer: (c) user's model

18. Which is a stimuli category?

a. Management stimuli

b. Hardware stimuli

c. Software stimuli

d. Periodic stimuli

Answer: (d) Periodic stimuli

19. An object does NOT provide this service:

a. Deactivating & Activating Objects

b. Files implementing the identified entities in the ERD

c. Registering object implementation

d. Security features

Answer: (b) Files implementing the identified entities in the ERD

20. Out of these, which one isn't a business process's example?

a. purchasing services

b. testing software

c. designing a new product

d. hiring an employee

Answer: (b) testing software

21. Which one of these is a data problem?

a. record organisation problem

b. hardware problems

c. loss of comments

d. heavy computational demands

Answer: (a) record organisation problems

22. The FIT (Failure In Time) is another way in which one can REPORT _____.

c. MTBF

d. MTSF

a. MTTF

b. MTTR

Answer: (a) MTBF

23. What does quality assurance?

a. A widely used strategy to implement statistical quality assurance

b. Six standard deviations

c. A widely used strategy that maintains statistical quality assurance and six standard deviations

d. An FTR (Formal Technical Review) guideline for inspection or a quality walkthrough

Answer: (c) A widely used strategy that maintains statistical quality assurance and six standard deviations

24. Name an evaluation technique to assess the quality of test cases.

a. Validation

b. Mutation analysis

c. Performance analysis

d. Verification

Answer: (b) Mutation analysis

25. Code is checked in which type of testing?

a. White box testing

b. Black box testing

c. Green box testing

d. Red box testing

Answer: (a) White box testing
